Linxi Li

Senior UX Designer · Risk, Compliance & Regulated Enterprise Systems

hellolinxi.com · linkedin.com/in/lilinxi · Linxi_Li@outlook.com · +86 159 2129 4126 · Shanghai, China

Senior UX designer with 8+ years designing for high-stakes, regulated decisions: PayPal's risk & control portal, usability validation behind NMPA registrations, and real-time risk views on Apple's production-ramp platform. MSc, TU Delft · iF & Red Dot winner · Mandarin (native), English (fluent).

EXPERIENCE

Apple · UX Designer, On-site Contractor — Sep 2025 – Aug 2026 · Shanghai

- Led the **0→1 UX architecture** of a production-ramp monitoring platform for Apple product launches, replacing Excel trackers, email threads and **100+ page weekly reports** with one shared real-time view.
- Designed the callout-first summary dashboard and key-metric visualizations so leaders spot cross-product risks at a glance; reporting moved from **weekly snapshots to minute-level updates**.
- Unified **18 modules** under one design language (solo, then with a second designer) and aligned **11+ stakeholders** across product, business and engineering; **Wave 1 launched** and set the structure for Wave 2.
- Designed v2.0 features for an OEM production-line build-up data platform, improving readability and workflow efficiency for multi-role, high-frequency tasks across input/output, capacity, delivery and shipping.

Freelance · Independent UX Designer — Feb 2023 – Aug 2025 · Shanghai

- **Emergo by UL** — Supported human-factors and summative usability validation for a modular surgical robotics system's NMPA registration amendment: **14 simulated-surgery sessions** with **57+ clinical professionals**.
- **PayPal** — Designed the UI/UX of a visualization-driven risk & control portal, turning the search, comparison and simulation of controls across business hierarchies into guided decision support.
- **Chenhui Venture Partners** — Designed an AI-chatbot game that simulates startup challenges for the firm's AI Lab.

Philips · Senior UX Designer, Healthcare — Nov 2017 – Jan 2023 · Shanghai

Associate UX Designer (2017) → UX Designer (2019) → Senior UX Designer (2022)

- Designed a radiology **equipment data-management system** deployed in **10+ hospitals**, replacing paper tracking boards, plus **3+ 0→1 clinical tools** for report management, ultrasound ROI drawing and maintenance scheduling.
- Ran usability evaluations for a **PACS and a radiology AI platform**, contributing to their first **NMPA registrations**.
- Localized the **Vue radiology suite** (acquired from Carestream) and designed China-first products: a respiratory-therapist app, a film-printing kiosk and a **post-PCI home-care platform**.
- Extended the design system for **large wall-mounted dashboards** with six task-type patterns used in live projects.
- Mapped sleep & respiratory-care service journeys through field research with distributors and service partners.

EDUCATION

Delft University of Technology · MSc, Design for Interaction — 2015 – 2017 · Delft, The Netherlands

Project: Excelscope 2.0, affordable malaria diagnosis for rural Uganda · exhibited at Dutch Design Week 2017

National Chengchi University · Exchange Program, Communication — 2014 · Taipei

Sun Yat-sen University · Bachelor, Creative Media — 2011 – 2015 · Guangzhou

SKILLS

Design	Enterprise UX · data visualization · design systems · prototyping · large-screen & kiosk UI
Research	Co-creation workshops · field research · interviews · surveys · usability testing · service blueprints
Domain	Risk & control management · compliance workflows · NMPA regulatory usability · fintech
Tools	Figma · Sketch · Framer · Axure · After Effects · Claude Code

AWARDS & PATENT

Design patent (GUI) · Medical-system event timeline — UI/UX designer · CN307853843S — 2022

Red Dot Best Design Team · Philips healthcare design team — team member for five years — 2022

iF & Red Dot: Best of the Best · Philips NightOwl baby monitor — companion IoT app UI/UX — 2021, 2022

iF & Red Dot · Philips air purifier & rice cooker series — LED & tangible UI/UX — 2018, 2019, 2021

iF Design Award · Philips Design Language System — added the large-screen display patterns — 2022
